

# Survey Design Document

## 1. Survey Questions

Q1 — Multiple choice (Required) What is your current job search status?

- Actively searching — applying now
- Passively open — would consider the right role
- Recently employed — searched within the last 6 months
- Not currently looking

Q2 — Multi-select (Required) Which tools or platforms do you currently use in your job search?  
(*Select all that apply*)

- LinkedIn
- Indeed
- Glassdoor / Handshake
- ChatGPT or other general AI tools (for resume/cover letter)
- Jobright AI
- Simplify
- Teal / Jobscan / Rezi
- Other AI job-search tool
- None — applying manually / directly

Q3 — Likert scale (Required) How much of a problem are each of the following in your job search? (*1 = Not a problem at all · 5 = Major pain point*)

- Finding relevant job listings
- Tailoring resume for each role
- Filling out long application forms
- Getting ghosted / no response
- Knowing if I'm qualified before applying
- Stale or fake job postings

Q4 — Multiple choice (Required) Have you heard of Jobright AI?

- Yes, and I currently use it
- Yes, and I tried it but stopped
- Yes, but I haven't tried it
- No, I've never heard of it

Q5 — Likert scale (Required) If you have used Jobright AI or a similar AI job tool, how satisfied were you with each area? (*1 = Very dissatisfied · 5 = Very satisfied · N/A = Did not use*)

- Job matching / relevance

- Resume tailoring quality
- Application autofill accuracy
- Freshness of job listings
- Billing / pricing transparency
- Customer support responsiveness

Q6 — Open-ended (Optional) What is the single biggest frustration you've had with any AI job search tool you've used? If you haven't used one, describe your biggest frustration with job searching generally.

Q7 — Multi-select, pick top 3 (Required) Which features would be most valuable to you in an AI job search tool? (*Select your top 3*)

- Real-time alerts for freshly posted jobs
- AI resume tailoring that reflects my real experience (not just keywords)
- One-click autofill for application forms
- Match score showing how well I fit a role before I apply
- AI-generated cover letters
- Interview preparation coaching
- Insider connections / referral finder at target companies
- Application tracking dashboard
- Verified, non-expired job listings only

Q8 — Multiple choice (Required) How important is it that an AI tool never fabricates or exaggerates your experience in resumes or application answers?

- Extremely important — I would not use a tool that does this
- Very important — I'd want strong safeguards against it
- Somewhat important — I'd verify outputs before submitting
- Not important — I'd edit anything as needed

Q9 — Multiple choice (Required) What is the maximum you would pay per month for an AI job search tool that meaningfully improved your interview rate?

- \$0 — Free only
- \$1–\$10 per month
- \$11–\$20 per month
- \$21–\$40 per month
- \$40+ per month

Q10 — Likert scale (Required) How likely would you be to switch to a new AI job search tool if it offered the following? (*1 = Very unlikely · 5 = Very likely*)

- Guaranteed fresh / verified listings only
- Resume AI that never invents facts
- Transparent, easy-to-cancel pricing

- Global coverage (not just US)
- Fully working auto-apply (no waitlist)

Q11 — Multiple choice (Required) Which best describes your career stage?

- Student or recent graduate (0–2 years experience)
- Early career (2–5 years)
- Mid-career (5–10 years)
- Senior / leadership (10+ years)
- Career changer

Q12 — Open-ended (Optional) Is there anything else you'd like us to know about your job search experience — or what your ideal AI job search tool would look like?

## 2. Distribution Plan

### Target Audience

Active job seekers, recent graduates, and career changers in the US. Minimum age 18. No maximum experience level.

### Target Response Volume

- Minimum: 50 responses (enough for basic pattern analysis)
- Ideal: 100+ responses (enough for cross-tabulation by career stage and tool usage)

### Distribution Channels

#### Channel 1 — Reddit Communities

| Subreddit           | Approach                                         | Suggested post title                                                      |
|---------------------|--------------------------------------------------|---------------------------------------------------------------------------|
| r/jobsearch         | Post survey with context                         | "Quick 4-min survey on AI job search tools — looking for honest feedback" |
| r/cscareerquestions | Post in weekly discussion threads                | "Surveying job seekers on AI tools — would love your input"               |
| r/recruitinghell    | Post with empathy — this community is frustrated | "Trying to understand what's broken in job search tools — 4-min survey"   |
| r/resumes           | Post in pinned weekly thread                     | "Survey: what do you actually want from an AI resume tool?"               |

## Channel 2 — University & College Career Groups

| Group Type                               | Where to find them                            | Approach                                          |
|------------------------------------------|-----------------------------------------------|---------------------------------------------------|
| University career center Facebook groups | Search "[University name] careers"            | Message the group admin asking permission to post |
| LinkedIn university alumni groups        | Search your university on LinkedIn → Alumni   | Post directly with context about the research     |
| Discord career servers for students      | Servers like CS Career Hub, Graduation → Jobs | Post in #resources or #surveys channel            |

## Channel 3 — Job Seeker Communities

| Community                         | Platform           | Where to post                                                                |
|-----------------------------------|--------------------|------------------------------------------------------------------------------|
| Job Search Community              | Facebook Group     | Post in main feed with context                                               |
| Tech Interview Handbook community | GitHub Discussions | Post in general discussion                                                   |
| Layoffs.fyi community             | Slack workspace    | Post in #job-search channel                                                  |
| LinkedIn feed                     | LinkedIn           | Post as a personal update tagging relevant hashtags: #jobsearch #careers #AI |

## Distribution Timeline

| Week   | Action                                                            |
|--------|-------------------------------------------------------------------|
| Week 1 | Launch on Reddit (r/jobsearch + r/cscareerquestions) and LinkedIn |
| Week 2 | Post in university groups and Discord communities                 |
| Week 3 | Post in remaining Reddit communities and job seeker Slack groups  |
| Week 4 | Send reminder posts in highest-performing channels; close survey  |
